

Bruce McNeil

My art demonstrates the poetic and lyrical beauty of the power of the mind conjuring up ancient relic modes of transportation. These distinct images document, and promote the diverse history and culture, of our nation's capital and surrounding areas. Each image is inclusive of multiple historic locales that narrate its own story.

I present my environmental fine art photography with figurative subjects to depict the revered cityscapes, landscapes, and connected values that shape a sense of place for reflection and celebratory times. Throughout my life, I have experienced treasured memories of many varied communities in the Washington Metropolitan Area.
